DETAILED ACTION

Drawings

The drawings submitted on 2/13/2004 are accepted by the Examiner.

Allowable Subject Matter

Claims 6-9 and 12-24 are allowed.

Claims 13-24 are allowed for reasons given in the previous Office Action.

The following is an examiner's statement of reasons for allowance claims 6-9 and 12:

A method for controlling a node in a network comprising the steps of:

- storing a network identifier indicative of the network which the node is associated with;
- receiving messages from other nodes and extracting network identifiers from said messages indicative of the network which the sending node is associated with;
- comparing the received network identifier with the stored network identifier;
- carrying out a duplicate address detection process when the stored network identifier is different than the received network identifier;
- receiving an address request message transmitted from a second node and determining whether such message includes a flag to indicate that a duplicate address detection process is being carried out by the second node as a result of the second node having received a network identifier different than a network identifier stored by it;

and further comprising the steps of:

(a) initiating a duplicate address detection process in response to the receipt of an address request message including said flag,

wherein the start of the duplicate address detection process is deferred for a period of time; and wherein the period of time is determined at random as recited in claim 6.

(b) initiating a duplicate address detection process in response to the receipt of an address request message including said flag,

wherein after a duplicate address detection process has been initiated in response to the receipt of an address request message including said flag, address request messages which are received for a period of time thereafter do not initiate a duplicate address detection process as recited in claim 7.

(c) retransmitting received address request messages for reception by other nodes as recited in claim 8.

(d) generating the network identifier itself; and

waiting for a predetermined period of time to establish if any messages containing a network identifier are received from another node and if no such message is received carrying out the generating step as recited in claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
